Recruiting Manager

Walt Disney Imagineering (WDI)

Lake Buena Vista, FL

Dear Recruiting Manager:

I am writing to apply for the WDI Show Control Software Intern (Florida), Summer/Fall 2026 position (Req ID 10143303). I am a Computer Science student in UCF's Burnett Honors College. I am interested in building reliable software that supports real systems. In this role, I would contribute careful development, testing, and documentation to help deliver stable show software for interactive guest experiences.

Walt Disney Imagineering has a strong reputation for combining creative design with engineering rigor. This internship stands out because it emphasizes the full software lifecycle: requirements, module design, implementation, testing, and maintainable documentation. That is the kind of environment where I learn best, because it rewards precision, clear communication, and accountability for the final system.

In my role at Digital E Consulting, I performed data analysis and piloted drones for field data collection and mapping workflows. I planned data capture, organized datasets, and produced ArcGIS outputs that others needed to understand quickly. This work honed my attention to detail, documentation habits, and ability to meet deadlines while working with a team.

My experience tutoring elementary STEM students through FIU ENLACE and supporting math tutoring through CITECI provided me with strong communication skills. I learned to explain concepts clearly, adjust my approach based on the learner, and stay consistent. These skills translate well to writing documentation and collaborating with different teammates in a technical environment.

I welcome the opportunity to further discuss my qualifications for this position. Thank you for your consideration.

Sincerely,

A handwritten signature in black ink, appearing to read 'Tomas A. Genatios Arenas', written over a horizontal line.
